OUR VISION

To be the Gulf's leading sustainable investment beacon, driving excellence and innovation in diversified sectors, and the preferred partner to our clients. With a discerning focus on sustainability, we aspire to set unparalleled standards in managing natural resources, forging impactful partnerships, and building a legacy of responsible growth.

OUR MISSION

To actively shape the landscape of sustainable investment within the Gulf region. Our focus is on building and managing tangible, impactful businesses that contribute to preserving resources and growing natural capital sustainably. Through collaborative teamwork and a commitment to integrity, we aim to transform innovative practices into green and scalable solutions. Our approach is rooted in responsible stewardship of resources and the pursuit of circularity in our operations. This commitment not only furthers economic development but also ensures our contributions towards a sustainable future for the communities we serve.

OUR VALUES

We take pride in our values as a company as we strive for success.

OUR STRENGTHS

1 | INTEGRATED MANAGEMENT

The importance of integrated management within the group is seen through the success of our ongoing projects, which ensure satisfactory results for customers and partners. The clear structure of Mawarid Holding Investement contributes to the group's technical and operational expertise and ensures the availability of both the administrative and technical staff to maintain productivity to work in accordance with the plans and strategies adopted.

Mawarid Holding Investement has the necessary capabilities to carry out infrastructure work, planning, and design. Also, our light and heavy fleet equipment have facilitated operations on work sites. The group is always interested in sustaining natural resources and recycling operations, which include the recycling of irrigation pipes and agricultural waste.

2 | POLICIES AND PROCEDURES

In accordance with contractual frameworks, Mawarid Holding Investement adopts a set of detailed and structured internal policies and procedures related to administrative work. These processes spread the culture of outstanding performance and motivate individuals to be productive. In addition, the group constantly strives to introduce and develop modern technology that is suitable for business development to ensure the continuous and systematic training of our staff.

3 | DEVELOPMENT AND RESEARCH

The presence of a research and development department, which includes a group of experienced and highly qualified professionals, has contributed to the continuous development and modernisation of the group. The Research and Development Centre contributes to the research on plants, forests, wildlife, water, and alternative energy; the centre also reviews the best international practices and applies them where appropriate.

MAWARID DESERT CONTROL LLC

موارد ديزرت كنترول
Mawarid Desert Control

MAKE EARTH GREEN AGAIN

Mawarid Desert Control is a leading provider of smart agriculture solutions to combat desertification and soil degradation. The company focuses on sustainable ecosystem management across the Middle East using Liquid Natural Clay (LNC) and the reduction of water consumption.

Liquid natural clay can be sprayed directly onto the ground, and gravity will pull the compound down into the soil. Sticking to each grain of sand, it creates a soil structure (even in desert sand) that retains water just like a sponge. One application of liquid natural clay lasts for approximately 3-5 years. Water savings take effect immediately as does the reduction in the quantum of fertilizer needed resulting in excellent return on investment.

MAWARID CENTRE FOR RESEARCH AND SCIENTIFIC LABORATORIES LLC

مركز موارد

Mawarid Centre

للأبحاث والمختبرات العلمية
Research and Scientific Laboratories

Mawarid Labs is a unique entity specialized in research and laboratory services relating to plant, water and soil, along with breeding, conservation and health management of rare and endangered wildlife & livestock species. Its research and diagnostic laboratories are equipped with state-of-the-art facilities, with specialized and well-trained staff. Identifying new technologies, products and innovations and providing the required expert scientific advice when needed, with the goal of enhancing the company's business objective and improving the services and products as per the anticipation of our current & future clients.

The center is also providing services to external customers in line with best international practices, and involved in collaboration activities with other recognized national and international entities and governmental agencies.

MAWARID INTELLIGENT IRRIGATION TECHNOLOGIES LLC

Mawarid Intelligent Irrigation Technologies' ("MIIT") vision is to revolutionize water utilization efficiency in agriculture, forestry, and landscaping by leveraging advanced technology and data-driven solutions. Through the integration of cutting-edge irrigation technology, satellite imaging, artificial intelligence (AI) driven algorithms, and cloud-based platforms; MIIT contributes to the vitality of natural landscapes, abates water wastage while maximizing crop yields making it a vital player in promoting sustainable agriculture (water-energy-food nexus) and ecosystem preservation.

The integrated irrigation technology enables producers to intelligently manage water resources to reduce water consumption by up to 40% concurrently with increased crop yields by as much as 25%. The technology provides 24/7 monitoring of sites, data insights that support optimization of day-to-day farming practices, and early warning of extreme adverse weather events.

Overall, MIIT's technology aligns with the UAE's commitment to sustainable resource management and responsible environmental practices.
